Projects

Anime Quote Generator https://luzmlx.github.io/anime-quote-generator/ A simple JavaScript based application using a third party API to generate anime quotes. You are able to search an anime character to generate 10 quotes from that character or press the button to generate a random quote.	JUNE 2021 -JUNE 2021
To Do List https://festive-saha-46e005.netlify.app A responsive web application built with ReactJs and JSON. Utilizes full CRUD, allowing you to create, update, and delete tasks from your list.	JUNE 2021 -JULY 2021
Vagary https://dazzling-ramanujan-14f249.netlify.app/ Group built MERN stack application. A responsive travel itinerary website that allows a user to add an itinerary and a todo list within that itinerary. The user will have the ability to edit and delete their list or itinerary.	JULY 2021 -AUG 2021
Sweet Treats https://sweettreatss.netlify.app Full-stack, full-CRUD web application, utilizing a RESTful JSON API with React on Rails stack. A bakery application that, once signed in, allows you to create a cake product with information and gives you the ability to edit any information within that product you made. You are able to read other cake products, but won't be able to edit them, only the ones specific to you.	AUG 2021 -SEPT 2021
